

Technology Expert Labs for Guardium

Whether you are new to IBM Security Guardium or have an existing installation you wish to expand, our Expert Labs team can provide a proven approach to planning, installation, migration, upgrade or optimization of a Guardium solution.

Business challenges

You're faced with a wide spectrum of use cases in the complex data landscape—all of which make data security and compliance an even more pressing challenge, resulting in ineffective implementation and underutilization of these powerful tools.

We provide guidance & assistance, encompassing the **full product lifecycle from concept through support**. Our technical and domain expertise will assist you with Data Security objectives and effectively implement and utilize these technologies, improve product efficiency, utilization of resources, and unlock the full potential of Guardium achieving business, goals such as:

- Finding and mapping structured and unstructured data on cloud or on-premises
- Uncovering deviations in policies that suggest risk
- Complying with current and future data regulations
- Proactively mitigating issues or violations
- Bringing insights into a centralized place

Why use Technology Expert Labs?

Get paired with a trusted advisor who has the expertise to help your organization execute on its objectives with data protection and digital trust.

When you engage with our team, we can help you implement a stable and scalable architecture, protect your business from data risk, and maintain a solid, compliant solution.

What do we offer?

Getting Started Services

Our expert consultants know the ins and outs of the Guardium portfolio, which makes Security Expert Labs a natural partner to deploy your Guardium solution.

Optimizing Data Security

Our team can provide a comprehensive review of your Guardium deployment, including in-depth analysis and actionable recommendations on architecture, configuration and monitoring.

Expanding Data Security

Quickly engage expert Guardium resources to optimize, tune, upgrade, migrate or expand your deployment to increase peace of mind that your data is protected.

Ongoing Expert Guidance

Our team can provide regular, subscription-based guidance from our technical experts in all phases of design, deployment, operations, migration, upgrade and transformation, while building your own team's capacity and skill.
