

W&W Gruppe partners with IBM to meet regulatory compliance

For over 15 years, W&W Gruppe has partnered with IBM Technology Lifecycle Services, appreciating their extensive array of services. Among these, the repeat testing of electrical equipment connections in alignment with DGUV V3 regulations. Conducted by certified IBM professionals, these inspections are vital for preventing workplace accidents, ensuring operational safety, and maintaining valid insurance coverage. At W&W Gruppe we can trust that our equipment remains secure and compliant thanks to these rigorous checks. The ability to test devices without disrupting operations highlights IBM's dedication to safety, efficiency, and regulatory compliance which has solidified our long-standing relationship.

[Visit IBM TLS Infrastructure Services](#)

IBM TLS can help clients navigate complex regulatory landscapes with expert guidance, tailored solutions, and robust risk management strategies.

The main solution benefits for WW& Gruppe are:

- Holistic approach for both IBM and non-IBM products
- Prevent cost-intensive outages and data loss
- Documented test reports as proof for insurance companies and authorities
- Facilitate compliance with legal obligations and avoidance of liability risk
