

Oracle Cloud Infrastructure

Improve performance and security while reducing costs for your enterprise and performance-intensive applications with Oracle Cloud Infrastructure, implemented and managed by IBM.

Oracle Cloud Infrastructure (OCI) is an enterprise cloud that delivers a set of platform cloud services including powerful compute, storage and networking capabilities optimized for Oracle applications.

Built from the ground up, OCI supports existing workloads while delivering modern cloud development tools, from application development and business analytics to data management, integration, security, AI and blockchain, enabling enterprises to bring their past forward as they build their future.

IBM Consulting can deliver the combination of business and technology skills you need to modernize, run, manage and secure your mission-critical applications on OCI to help you:

- Become production-ready 50% faster using IBM automation for all Oracle ERPS¹
- Increase efficiency 70% by reducing manual tasks¹

Compute

Analytics and Big Data

Networking, Connectivity and Edge Services

Management and Governance

Security, Identity, and Compliance

Application Development

Database Management

Emerging Technologies

Storage

Integration

To help optimize your investment in Oracle applications, IBM Consulting can:

Accelerate with operational excellence

- Industry-leading service powered by certified staff and proprietary tools:
 - Automate 75% of routine manual tasks to build and manage OCI using our proprietary automation and monitoring tool, OCTA1
 - Smart original equipment manufacturer (OEM) library to extend, calibrate and optimize monitoring of Oracle Applications and database
 - IBM database analysis reporting tool (DART) tool offering more than 50 custom queries to perform preventive database maintenance and rapidly identify root cause
 - Fully automated code deployment tools for Oracle CEMLI framework deployment
 - IBM Digital Workers providing automation and self-healing to reduce downtime and ticket creation
 - AI-based tools built into the Oracle Managed Applications platform to execute preventive maintenance, reduce false alarms and gain insight into high-volume operational data
 - Integrated with ServiceNow for help-desk support automation

Reduce risk with built-in security services

- Built-in certification for regulatory compliance embedded with industry standards (HIPPA, PCI, ITIL, ISO, SOC compliance)
- IBM Security® services to support OCI including antivirus, penetration testing, IAM, SIEM and DDoS

Simplify Oracle service requests with a single unified service portal

- Our unified client portal is a one-stop shop for analytics, monitoring and managing multicloud workloads, delivering a security-rich, scalable, flexible managed platform on OCI.

Operate mission-critical applications with confidence and certainty

- Lean on IBM's more than 20 years of experience as a major managed services provider specializing in hybrid cloud migrations and data center management and delivering world-class SLAs.

Why IBM

IBM is one of Oracle's most significant partners, with a 34-year partnership and Platinum Level and Cloud Elite status. IBM has more than 10,000 dedicated Oracle consultants and has helped clients successfully complete more than 6,500 Oracle projects. IBM offers services to help you at each stage of your Oracle investment, from consulting to implementation to management.
