

Payment plans for IBM Cloud Paks

Accelerate your modernization projects with flexible payment solutions

Organizations are adopting hybrid cloud, AI, and automation to accelerate innovation, speed time-to-market and meet evolving business demands.

To help advance your digital transformation, IBM Cloud Pak® built on Red Hat® OpenShift®, offers AI-powered software for hybrid clouds that are designed with prediction, security, automation and modernization capabilities.

Reduce upfront payments

Optimize cash flow

Enhance ROI

Integrating a flexible and innovative financial strategy may help fuel your IBM Cloud Pak solutions

Using a payment solution for your IBM Cloud Paks may help speed up your project approval and minimize upfront cash outlays to preserve cash and enhance return on investment (ROI).

A health insurance company was modernizing and transforming to a hybrid cloud infrastructure model and needed to deploy IBM Cloud Paks. Instead of one upfront cash outlay, IBM was able to provide an innovative financing solution that helped flatten payments over two years. The company was able to benefit from enhanced cash flow and ROI.

IBM payment plans allow companies to optimize cash flow with a payment structure tailored to their specific budget requirements and preserve cash to invest in other projects. Aligning payments more closely with anticipated benefits or milestones could potentially help enhance ROI for the specific solution or project.

An electronics company deploying IBM Cloud Paks with IBM Garage™ chose a payment plan aligned to anticipated business benefits. This helped the company make smaller payments at the beginning of the project, and larger payments at the end of the project when benefits were fully realized.

Why IBM?

IBM provides flexible payment solutions for IBM software, IT infrastructure, selected services, and Red Hat subscriptions and services that may help you start projects sooner, achieve your business goals more quickly and gain increased flexibility and agility.

IBM Financing offerings are provided through IBM affiliates and/or subsidiaries and divisions worldwide to qualified commercial and government clients. Payment options and terms are based on a client's credit rating, offering type, equipment, product type and options, and may vary by country. This offering does not guarantee that credit will be provided. Payment options for non-IBM content, which is part of an overall IBM end-user client solution, may also be eligible through IBM Financing. Other restrictions may apply. Payment options are subject to change, extension, or withdrawal without notice and may not be available in all countries. For certainty, the provision of offerings by IBM and IBM Financing do not, nor intend to, offer, or provide accounting, tax, or legal or regulatory compliance advice to clients. Clients are responsible for and should obtain their own expert advice, including consulting with their own financial, tax, and/or legal advisors, as applicable. Any tax or accounting treatment decisions made by or on behalf of the client are the sole responsibility of the client.

IBM Financing lease and financing offerings are provided in the United States through IBM Credit LLC. For IBM Credit LLC in California: loans are made or arranged pursuant to a California Financing Law License.
