IBM i Solution Editions with Subscription Term Licenses

Solutions built for business, combining industry-leading applications with IBM i and Power

Highlights

Integrated solutions for SMBs through partnerships with ISVs

Simplified, flexible, and highly secure infrastructure

Mitigates risks associated with adopting new technologies

Speeds implementation time for deploying new applications

IBM i Solution Editions are designed to help companies take advantage of the combined experience and expertise of IBM and ISVs by building business value into IT solutions. Through innovation and technology leadership, IBM i Solution Editions help provide maximum flexibility in compute consumption and application choice, providing an answer for today's demanding business requirements. IBM i Solution Editions are a combination of IBM i with subscription term licenses and IBM® Power® packages designed to be easily purchased from ISVs.

Power10 processor-based servers are the platform for IBM i Solution Editions. With Power10 technology and IBM i, companies will benefit from leading processor speed with an intelligent operating system that minimizes complexity, automates processes, reduces downtime, and enhances security, all while reducing operational costs. The value of Solution Editions can be measured by the total integration delivered by IBM i, Licensed Program Products for IBM i, and application performance, all while delivering a low Total Cost of Ownership.

IBM i Solution Editions

IBM i integrates a relational database (IBM® Db2® for i), security, web services, networking, and storage management capabilities. It provides a broad and highly stable database and middleware foundation for efficiently deploying business processing applications, which enables a lower total cost of ownership when compared with other operating environments. Together, IBM i and Power are offered through an extensive, highly skilled, and worldwide network of IBM Business Partners that is backed by IBM's trusted services and support infrastructure.

IBM develops, fully tests, and preloads the core middleware components of IBM i together, helping companies to deploy applications faster and maintain them with fewer staff. IBM i Solution Editions include IBM® Power® Virtual Server (IBM PowerVS) cloud credits for new clients allowing them to try IBM PowerVS at no cost.

The IBM i Solution Edition configuration can be expanded, allowing for flexible quantities of memory, disk, and network adapters to address infrastructure requirements.

IBM i Solution Edition	Power S1012 1 and 4 cores	Power S1014 4 cores
Edition feature codes	#4948, #4968	#4968
IBM i processor Subscription (min 1)	Standard price	Standard price
IBM i user Subscription (min 10)	Reduced price on initial purchase	Reduced price on initial purchase
Rational Development Studio (5770-WDS) Subscription	Reduced price on initial purchase	Reduced price on initial purchase
IBM PowerVS Cloud Credits (available to new clients)	2000	2000

Qualification	Power S1012 1 and 4 cores	Power S1014 4 cores
Must be a new purchase, ordered with an IBM i Solution Edition feature code	Yes	Yes
Must have proof of purchase for software, maintenance, services and/or training from a registered ISV	Yes	Yes
Proof of purchase from a registered ISV must be dated within 90-day window of hardware order	Yes	Yes
The combined value (software, maintenance, services, training) of the registered ISV purchase must be	USD 6,500	USD 6,500
Purchase amount must be from one registered ISV only, it cannot be combined from multiple	Yes	Yes
Total registered ISV purchase amount must be traceable to the specific machine serial number to be applicable	Yes	Yes

Together, IBM and leading ISVs provide solutions that combine the capabilities of IBM i and Power with the strength of business applications, along with superior service and support. Companies choosing IBM i Solution Editions will benefit from increased insights for more assured decision making, enhanced productivity, adaptability to business changes, and a lower total cost of ownership.
