

# Expert Labs for IBM watsonx Assistant for Z

Our Expert Labs team can provide a proven approach to implement IBM watsonx™ Assistant for Z within your mainframe environment, accelerating the tool's adoption cycle.

IBM watsonx Assistant for Z is a generative AI solution that transforms and simplifies the way IBM Z® users of all experience levels engage and interact with the mainframe to be more productive.

## Business challenges

You want to streamline your mainframe operations and enhance your teams' productivity when engaging with the mainframe. IBM watsonx Assistant for Z can reduce the lead time before IBM Z professionals are able to perform tasks autonomously.

Our technical and domain expertise is designed to:

- Leverage gen AI to quickly take advantage of automation that can be used by system programmers and operators of all experience levels.
- Understand how to leverage watsonx Assistant for Z to reduce the learning curve for early tenure professionals.
- Enable IBM Z experts to codify their knowledge for improved access to information and collaboration. Experts can use available pre-built skills or import existing ones to build simple or advanced automations faster, all in just a few simple steps, with the low-code Skills Studio.

## Why use IBM Expert Labs?

IBM Expert Labs is your trusted advisors, helping you optimize and fully leverage IBM watsonx for Z. Our team enhances mainframe productivity by using gen AI to automate complex tasks and deliver real-time insights, accelerating your business outcomes.
