9:45 - The Business Value of DevOps
10:15 - DevOps Customer Case Study
11:00 - Accelerating your DevOps journey
12:00 - Continuous Testing & Deployment Demo
1:15 Lunch

Companies are aggressively working to transform and embrace new technologies enabling them to rapidly deliver software innovation to their end users.

Teams often struggle getting started with the three key components of a DevOps approach: people, process, and tools.

This session will enable you to understand how to scale DevOps in your organization and employ hybrid cloud technologies to achieve business success.

“I attended the DevOps Networking Event in Portland, OR and it blew my mind. I enjoyed the opportunity to network with local colleagues that are also focused on DevOps. This is the future of IT!” - Nick Wylde, DevOps Specialist, Daimler
