IBM's longstanding, global commitment to corporate responsibility is a demonstration of our values and the priorities that guide them. By integrating corporate responsibility with business strategy, we contribute to the communities in which we do business while engaging our clients, partners and employees. IBM's technology and talent have the power to help transform governments, institutions, communities and the quality of life for people around the world. Whether it's improving education, revitalizing cities, protecting the environment or driving economic growth, IBM and IBMers contribute innovative solutions to the world's toughest societal challenges.

“IBM strives to be an essential company, not only to our clients, shareholders and employees, but also to the world at large — by engaging the communities where we do business and by providing leadership and tools in this Cognitive Era. Corporate citizenship is central to this vision, both worldwide and in the local examples shared in this report” says Dave Cole, managing director and senior state executive, Georgia.

**Education**
IBM's innovative P-TECH grades 9 to 14 model connects education to jobs. In the 2014-15 school year, P-TECH's first six graduates finished high school and college in just four years, as the P-TECH network expanded to 27 schools across three states. IBM also unveiled Code-name: Watson Teacher Advisor, an advanced cognitive computing system that will provide qualified lesson plans and mentoring to teachers via mobile devices — all free of charge. In addition, IBM has supported Communities in Schools and the Georgia Partnership for Excellence in Education to advance educational excellence in Georgia.
**Problem solving**

In 2014, 100 Corporate Service Corps teams worked on pro bono consulting projects to improve women’s health, preserve the environment, and more. Sixteen cities benefited from Smarter Cities Challenge® engagements. World Community Grid® helped strengthen the fights against cancer and Ebola by providing free “virtual supercomputing” power to humanitarian researchers.

IBM Impact Grants bring sophisticated capabilities to nonprofit organizations to help them serve their constituencies more effectively. More than 500 grants are made worldwide annually, including support for Georgia nonprofits. IBM is delivering a series of grants to the Westside Momentum initiative, in partnership with the Arthur M. Blank Family Foundation and the Georgia Center for Nonprofits, helping to transform Atlanta’s Historic Westside community.

**Employee engagement**

Nearly 270,000 active and retired IBMers have donated nearly 18 million hours of volunteer service through IBM’s On Demand Community,® and IBM’s Volunteer Excellence awards bestow CEO-level recognition on employees who personify IBM’s culture of service. U.S. and Canadian employees also can make cash contributions through payroll deductions.

**Disaster relief**

Integrating advanced technologies with the expertise of IBMers, IBM delivers essential components of what it takes for affected areas and individuals to regroup, rebuild and recover. In the United States, IBM aided Hurricane Sandy relief efforts in 2012-13 with initiatives worth an estimated $1.4 million.

**Corporate responsibility**

IBM pursues the highest standards of corporate responsibility, from how we support and empower our employees, to how we work with clients and govern the corporation.

- **Environment** — IBM’s comprehensive programs range from energy and climate protection to pollution prevention, chemical and waste management, resource conservation, and product design for the environment.

- **Supply Chain** — IBM buys from suppliers from nearly 100 countries and has infused social and environmental responsibility into the fabric of our business relationships.

- **Governance** — Our corporate culture is firmly based on ethics and integrity, guided by a rigorous system of corporate governance.

---
