IBM's longstanding, global commitment to corporate responsibility is a demonstration of our values and the priorities that guide them. By integrating corporate responsibility with business strategy, we contribute to the communities in which we do business while engaging our clients, partners and employees. IBM's technology and talent have the power to help transform governments, institutions, communities and the quality of life for people around the world. Whether it's improving education, revitalizing cities, protecting the environment or driving economic growth, IBM and IBMers contribute innovative solutions to the world's toughest societal challenges.

“To build a smarter planet — and to run a smarter enterprise — your business and citizenship strategies must be more than aligned. They must become one. This is very different from traditional notions of ‘giving back’ or CSR. Speaking as an IBMer, I believe this comes from the core of our culture, values and purpose as an enterprise — to be essential to our clients and to the world,” says IBM Chairman, President and CEO Ginni Rometty.

**Education**

In 2014, IBM unveiled Codename: Watson Teacher Advisor, an advanced cognitive computing system that will provide qualified lesson plans and mentoring to teachers via mobile devices — all free of charge. In the United States, IBM’s innovative P-TECH grades 9 to 14 model connects education to jobs. In the 2014-15 school year, P-TECH’s first six graduates finished high school and college in just four years, as the P-TECH network expanded to 27 schools across three states.
In 2014, IBM Uruguay contributed to the development of a mobile application for the interactive game “Nuestro Barrio” for early education. The current version of this educational game is Web-based and the project now is available for Android. The game received recognition from the National Preschool Council in Uruguay, and was deemed “Of Educational Interest” by the Ministry of Education in the Salta province of Argentina.

Problem solving
IBM Impact Grants bring sophisticated capabilities to nonprofit organizations to help them serve their constituencies more effectively. Worldwide, more than 500 grants were made in 2014. In Uruguay, Impact Grants have enabled more than 20 educational and not-for-profit organizations to enhance their IT infrastructure, and leadership and technology skills.

Worldwide, 100 Corporate Service Corps teams worked on pro bono consulting projects in 2014 to improve women’s health, preserve the environment, and more. Sixteen cities benefitted from Smarter Cities Challenge® engagements. World Community Grid® helped strengthen the fights against cancer and Ebola by providing free “virtual supercomputing” power to humanitarian researchers.

Employee engagement
Nearly 270,000 active and retired IBMers have donated nearly 18 million hours of volunteer service through IBM’s On Demand Community,® and IBM’s Volunteer Excellence awards bestow CEO-level recognition on those employees who, through their actions, best personify IBM’s culture of service. In Uruguay, IBM volunteers provided several training sessions in 2015 on “work readiness for youth,” reaching more than 100 young students.

Disaster relief
Integrating advanced technologies with the expertise of IBMers, IBM delivers essential components of what it takes for affected areas and individuals to regroup, rebuild and recover. Joining the global fight against Ebola and responding to the devastation of Hurricane Haiyan in the Philippines, with both immediate and long-term solutions, were just two examples of IBM’s agile and sustained 2014 disaster relief efforts.
