

Take your bank to market in less than 6 months

In the digital age, time is money. Your cutting-edge idea might be old news after you've secured financing, ensured regulatory compliance and set up IT infrastructure. Whether you're an established bank or a fintech startup, with Bank in a Box, you can go from idea to reality in under 6 months.

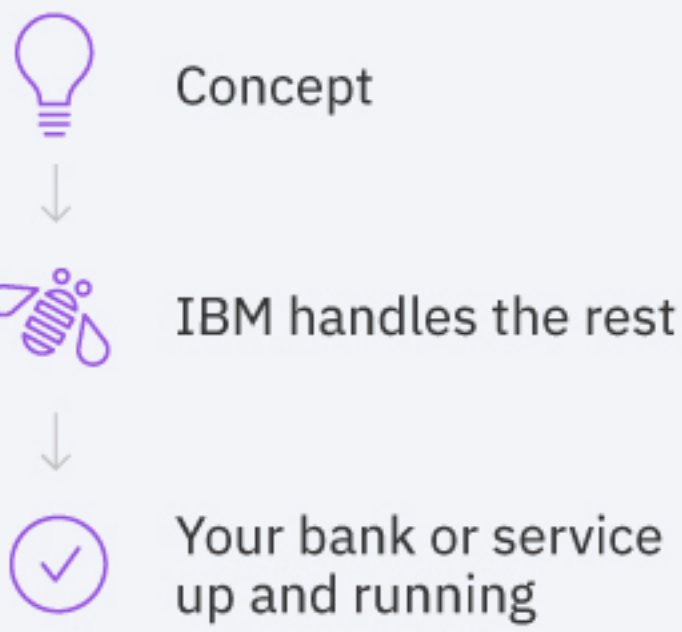

What is Bank in a Box?

A quick-to-deploy and easy-to-use solution with pre-configured capabilities to meet your technical and business requirements. Select additional components, like AI, Blockchain, CRM and ATM support on-the-go, as you need them.

6 months

Bank in a Box approach

18 – 24 months

Traditional approach

80%

of required features enabled in 3 months

20%

remaining featured enabled in the following 3 months

100%

operational system 6 months after signing the contract

5k–8M

accounts supported

So what's in the box?

Software and services hosted on enterprise class cloud platforms, in your country or in one of the international IBM Cloud data centers

Pre-configured interfaces to most common payment services and card providers

Embedded storage, networking and security

An interesting concept is enough to be successful on the current digital financial market. **You can leave the rest to IBM.**
