Presentation of Information in this Press Release

In an effort to provide investors with additional information regarding the company's results as determined by generally accepted accounting principles (GAAP), the company has also disclosed in this press release the following non-GAAP information which management believes provides useful information to investors:

IBM results --

- presenting operating (non-GAAP) earnings per share amounts and related income statement items;
- adjusting for free cash flow;
- adjusting for currency (i.e., at constant currency).

Free cash flow guidance is derived using an estimate of profit, working capital and operational cash outflows. The company views Global Financing receivables as a profit-generating investment, which it seeks to maximize and therefore it is not considered when formulating guidance for free cash flow. As a result, the company does not estimate a GAAP Net Cash from Operations expectation metric.

The rationale for management's use of these non-GAAP measures is included in Exhibit 99.2 in the Form 8-K that includes this press release and is being submitted today to the SEC.
