

Who we are

Pentech was founded in 2016. Since then, the company and its team, all with extensive experience within the financial sector, engineering and entrepreneurship has been set out to revolutionize the financial market with its next generation wealth management platform. The mission - To become the world leading B2B wealth management and compliance platform through a sophisticated algorithm-based solution.

What we do

Pentech offers a patented B2B investment algorithm that empowers investment professionals to offer real-time, goal-based advice at mass scale targeting customers across the entire financial market.

Pentech's sophisticated algorithm goes beyond reducing costs, it has compliance capabilities built-in and offers a comprehensive solution within a goal-based investment framework. The algorithm delivers a highly personalized & compliant solution while taking into account the inherent uncertainties of the financial market. The optimizer adjusts in real-time for changes in market conditions and in personal circumstances. It can be used autonomously at scale for a large number of end-clients or as a high-precision tool for asset managers, whether planning for short-term or long-term.

Through its worldwide collaboration with IBM, Pentech leverages IBM Cloud for a secure, highly available environment that enables continuous adaptation to changes in capacity requirements, while assuring high security for clients. In addition to IBM Cloud and IBM's implementation, integration & support capabilities, Pentech uses IBM Watson to enhance the customer experience through Watson Assistant.

What we like about IBM and “Start up with IBM”

1. IBM's products
2. Single point of contact at IBM
3. IBM is a strong reference in our industry and thereby a door opener for us

"IBM Cloud gives us a platform with scalability, security and ease of integration for our industry."

Firas Wade, founder, owner and Managing Partner, Pentech
