

IBM Systems Lab Services Training Offerings

The Voucher Zone - April 2019

Check out the April edition of **The Voucher Zone**, where Business Partners can explore ways to redeem their IBM education vouchers at IBM internal classes, self-paced virtual classes, hands-on labs, and events.

To enroll, complete the attached IBM Business Partner Voucher Registration Form. Registration for technical events can be completed via the event website links.

On the horizon: IBM Technical University Events

-
- **15 - 18 April** | [Dubai, UAE](#), Featuring IBM Power Systems and IBM Storage
- **23 - 25 April** | [Casablanca, Morocco](#), Featuring IBM Power Systems and IBM Storage
**All sessions will be in French*
- **24 - 25 April** | [Florianopolis, Brazil](#), Featuring IBM Power Systems and IBM Storage
**All sessions will be in Portuguese*
- **29 April - 3 May** | [Atlanta, Georgia, USA](#), Featuring IBM Z, IBM Power Systems and IBM Storage
- **7 - 9 May** | [Lagos, Nigeria](#), Featuring IBM Power Systems and IBM Storage
- **20 - 24 May** | [Berlin, Germany](#), Featuring IBM Z and IBM Storage
- **23 - 25 July** | Melbourne, Australia, Featuring IBM Z, IBM Power Systems and IBM Storage
- **Dates TBD July** | Buenos Aires, Argentina, Featuring IBM Power Systems and IBM Storage
- **Dates TBD July** | Bangkok, Thailand, Featuring IBM Z, IBM Power Systems and IBM Storage
- *Stay tuned for more [upcoming Technical University events](#) in 2019!*

Check out our Global Training Provider (GTP) offerings!

IBM's [Global Training Providers](#) offer a multitude of education offerings and services around the world. Visit the [IBM Skills Gateway](#) to see which training providers and offerings are available in your region and country.

Brought to you from IBM: Live Virtual Classes

IBM Systems Software Education (SSE) continually updates the [2019 training schedule](#) with new offerings. Need to plan ahead? The 3Q and 4Q classes will be added to the schedule over the next few weeks. Visit the [SSE Community](#) to check out the latest IBM live virtual classes, which are designed for IBM internal training and delivered by IBM subject matter experts. Seats in these classes are limited but open to Business Partners based on availability. Complete the attached **IBM Business Partner Registration Form** with your name, email, voucher number, and the offerings you've selected, and send it to voucher2@ca.ibm.com. A few highlights to consider:

Reminder: Recently Added Courses

- [Implementing Linux and KVM on Bare-Metal Power Systems](#): This course is available only from SSE as KLAHQV263.
- [IBM Spectrum Protect Plus 10.1.2 Implementation and Administration](#): This course is available as KLAHQVST3 from SSE and as [TSP11G](#) in the IBM Skills Gateway.
- [Introduction to Storage](#): This course is available from SSE as KLAHQVSS0 and from our Training Partners as [SS01G](#) in the IBM Skills Gateway.

More New Courses!

- [Advanced Docker for Power Systems](#): This is a follow-on course to our popular [Docker Fundamentals for Power Systems](#) course. Expand your Docker skills on the topics of Docker remote client, Docker registries, and Docker problem determination. Earn another Docker badge with this course as well! This course is available from SSE as KLAHQV873 and will be available in the future as LX062G in the IBM Skills Gateway.
- [IBM Cloud Private on Power Systems II: Managing IBM Cloud Private](#): This is part two to our [IBM Cloud Private on Power Systems I: Implementing and Managing](#) course. If you are required to implement and manage a Kubernetes-based IBM Cloud Private platform, this course is for you. It covers advanced administration and configuration of IBM Cloud Private. Students use the IBM Cloud private platform on a POWER8 processor-based server to work with images, applications, and manage a cluster. This course will have a new badge associated with it as well. This course is available as KLAHQV872 from SSE and it will be soon available as QZC41G in the IBM Skills Gateway.
- [DevOps with Private Cloud on IBM Power Systems](#): This course covers concepts involved in planning, deploying, and implementing Ansible, Chef, and Puppet, and will show how to integrate these tools with IBM Cloud PowerVC Manager. You will perform basic installation to advanced administrative tasks with these DevOps tools. This course is available as KLAHQV821 from SSE and it will be soon available as QZC50G in the IBM Skills Gateway.

Other SSE Offerings

- [IBM Power Systems Scale-up Technical Sales Certification Preparation Workshop](#): This is one class that we developed specifically for business partners. The course helps with your "POWER9 Authorization to Sell" certifications by preparing you for the "IBM Certified Specialist — Power Systems Scale-Up Technical Sales" certification exam. This class is available as KLAHQV390 from SSE and as [AN097G](#) in the IBM Skills Gateway for Global Training Provider (GTP) deliveries.
- Need to earn badges? [SSE has 13 "Skill" badges](#) for you to earn by successfully completing our classes. Instructors verify that you have completed all of the lab exercises successfully before authorizing your badge.

Reminder!

Business Partners must adhere to the [voucher terms and conditions](#) they received when the vouchers were issued. IBM Education vouchers may only be used by an employee of the company to which they were issued. Business Partners may not transfer vouchers to customers or to another Business Partner company.

IBM Business Partner Voucher Registration Form

To register for live virtual training, self-paced virtual classes, and hands-on labs, complete the attached IBM Business Partner Voucher Registration Form and send it to voucher2@ca.ibm.com.
