

Quick Start Guide

This guide describes a quick and easy way to install the product.

National Language Version: To obtain the Quick Start Guide in other languages, print the language-specific PDF from the installation media.

Product overview

IBM® Endpoint Manager, built on BigFix® technology, delivers endpoint lifecycle and security management through a single, lightweight, extensible infrastructure. The solution consolidates management of servers, desktops, laptops, and mobile devices with clear, accurate reporting and unparalleled control over today's increasingly complex physical and virtual infrastructures.

IBM Endpoint Manager enables organizations to securely manage even the most intermittently connected mobile users, delivering continuous updates regardless of connectivity to the internal corporate network and enforcing policies offline to ensure regulatory compliance. This dynamic, content-driven messaging and management system allows for quick delivery and adoption of new product capabilities and enables organizations to easily tailor solutions to meet their specific requirements.

IBM Endpoint Manager V9.1 delivers consolidated lifecycle management and security and compliance solutions. It adds new core capabilities and extends its platform coverage to include:

- More flexible deployment options with the addition of support for Red Hat Enterprise Linux and DB2® as an IBM Endpoint Manager Server platform.
- Native encryption capabilities for server to client communication and additional security configuration options for managing Internet-connected computers and mobile devices.
- Extended support for deployment of agents to Solaris 11, Debian 6, and Ubuntu 12.04 in addition to previously released support for Mac, OS X 10.8 and Windows 8 and Windows Server 2012.
- New, simplified Representational State Transfer (REST) based application programming interfaces (APIs) and an easy-to-use command line interface.

IBM Endpoint Manager for Power® Management V9.1 allows IT organizations to enforce conservation policies across the enterprise, while providing granularity that enables application of these policies to a single computer. For users, IBM Endpoint Manager for Power Management maximizes power policy deployment while minimizing usage impact through an optional "opt-in" approach. Granular controls also allow users to save their work before shutting the system down, ensuring no loss to productivity. IBM Endpoint Manager for Power Management can be used either as a stand-alone offering or integrated with IBM Endpoint Manager for Lifecycle Management and IBM Endpoint Manager for Security and Compliance.

IBM Endpoint Manager for Power Management:

- Reduces electric power costs while synchronizing energy conservation with maintenance processes
- Has endpoint power management combining policy-based energy conservation and wake-on-LAN technologies with Intel vPro power-on.

1 Step 1: Access the software and documentation

The IBM Endpoint Manager software can be accessed from Passport Advantage® or from DVD.

If you download your product from Passport Advantage, follow the instructions in the download document available at <http://www.ibm.com/support/docview.wss?rs=1015&uid=swg21662495>.

The IBM Endpoint Manager package includes the following product DVDs:

- IBM Endpoint Manager Version 9.1, Platform Installer
- IBM DB2 Workgroup Server Edition 10.5 - Linux 64-bit - Limited Use

For complete documentation, see http://pic.dhe.ibm.com/infocenter/tivihelp/v26r1/index.jsp?topic=/com.ibm.tem.doc_9.1/welcome/welcome.html.

2 Step 2: Evaluate the hardware and system configuration

See the IBM Endpoint Manager System Requirements at <http://www.ibm.com/support/docview.wss?rs=1015&uid=swg21652841>.

3 Step 3: Get started and install IBM Endpoint Manager

A complete IBM Endpoint Manager installation is composed of installation and registration of the platform, followed by the configuration of the applications:

1. For an introduction to the product platform and applications, see Getting Started
2. To learn about the installation of the platform and the product components, see Installation Guide.
3. Install IBM Endpoint Manager by following the instructions in the Installation Guide.
