Portal or user's home page or login is slow

Updated November 17, 2017 by Jay.Manaloto | Tags: None

Page Actions

Performance	Performance Best Practices	Performance Decision Tree	Performance Analyzer	Workflow Analysis Utility
-------------	----------------------------	---------------------------	----------------------	---------------------------

If your portal is slow or the user's home page or login is slow...

Review the section **7.3.2 Home Portal and Other Portals** in the [7 IBM TRIRIGA Tuning](#) best practices.

For 3.5.3 or later, analyze the issue with the [Performance Analyzer](#) while the user is logging in.
