

Quick Start Guide

Get started quickly with a typical installation of IBM Spectrum Control Advanced Select Edition.

Globalization Version: To get the Quick Start Guide in other languages, open the PDF files on the quick start guide DVD.

Product overview

With the IBM® Spectrum Control™ Advanced Select Edition licensed program (referred to in this document as "IBM Spectrum Control™"), you get storage analytics and optimization, policy-based automation, and service-level-based self-service and API provisioning. Additionally, the program offers all features of the IBM Spectrum Control Standard Edition license (capacity planning, performance monitoring, replication management, virtualization and cloud integration, simple provisioning, and automation enablement). The program includes application-aware, snapshot-based protection offered by IBM Spectrum Protect™ Snapshot (formerly known as IBM Tivoli® Storage FlashCopy® Manager). The IBM Spectrum Control Advanced Select Edition license includes a license for IBM Copy Services Manager (formerly known as IBM Tivoli Storage Productivity Center for Replication). Copy Services Manager manages 2-site replication, 3-site replication, and advanced copy services. To learn more about how to download and install it, see <http://www.ibm.com/support/knowledgecenter/SSESK4>.

The IBM Spectrum Control Advanced Select Edition license is priced by the number of storage enclosures that it manages.

1 Step 1: Access the software and documentation

To download the product from IBM Passport Advantage®, follow the instructions for your platform in the download document at <https://www.ibm.com/support/docview.wss?uid=swg24041108>. For detailed installation instructions, see the *IBM Spectrum Control Installation Guide* and for configuration instructions, see the *IBM Spectrum Control Administrator's Guide*. Both guides are at http://www.ibm.com/support/knowledgecenter/SS5R93_5.2.8/com.ibm.spectrum.sc.doc/fqz0_r_printable_pdf_files.html.

2 Step 2: Evaluate the hardware configuration

For information about the hardware requirements for the product, see the IBM Spectrum Control product documentation at http://www.ibm.com/support/knowledgecenter/SS5R93_5.2.8/com.ibm.spectrum.sc.doc/fqz0_r_hw_requirements.html.

3 Step 3: Evaluate the system configuration and install the prerequisite software

Use the following information to determine the prerequisite software and to install it on your system:

- To learn about the software requirements for the product, see the IBM Spectrum Control product documentation at http://www.ibm.com/support/knowledgecenter/SS5R93_5.2.8/com.ibm.spectrum.sc.doc/fqz0_r_sw_requirements.html.
- To learn about the supported hardware, products, and platforms that you can use with IBM Spectrum Control, see <http://www.ibm.com/support/docview.wss?uid=swg21386446>.

4 Step 4: Install DB2

Before you install IBM Spectrum Control Advanced Select Edition, you must install the version of IBM DB2® Enterprise Server Edition that ships with IBM Spectrum Control.

IBM Spectrum Control stores the information that it collects about storage resources in a DB2 database. For information about installing DB2, see http://www.ibm.com/support/knowledgecenter/SS5R93_5.2.8/com.ibm.spectrum.sc.doc/fqz0_t_installing_db2.html.

5 Step 5: Install IBM Spectrum Control

You can use an installation wizard or a command line in silent mode to install IBM Spectrum Control Advanced Select Edition. For detailed installation instructions, see http://www.ibm.com/support/knowledgecenter/SS5R93_5.2.8/com.ibm.spectrum.sc.doc/fqz0_t_installing_tpc.html.

6 Step 6: (Optional) Install Cognos Business Intelligence reports

The IBM Spectrum Control installation includes the option to install IBM Cognos® Business Intelligence (BI) reports and the components that are required to produce these reports: Jazz™ for Service Management and IBM Tivoli Common Reporting. Cognos BI is an optional tool for producing scheduled reports from the data that is gathered by IBM Spectrum Control. You can use the reporting features in the IBM Spectrum Control GUI to produce reports about the status, capacity, and performance of the storage resources that you want to monitor without installing Cognos BI.

For more information about Cognos BI reports, see http://www.ibm.com/support/knowledgecenter/SS5R93_5.2.8/com.ibm.spectrum.sc.doc/fqz0_c_webbasedgui_rpting_ic_ov.html. For information about the components that you must install to use Cognos BI reports, see http://www.ibm.com/support/knowledgecenter/SS5R93_5.2.8/com.ibm.spectrum.sc.doc/fqz0_c_jazzsm_tcr.html.

7 Step 7: Get started

Starting and configuring IBM Spectrum Control includes these tasks:

- Start the IBM Spectrum Control GUI. See http://www.ibm.com/support/knowledgecenter/SS5R93_5.2.8/com.ibm.spectrum.sc.doc/fqz0_t_starting_tpc_web_based.html.
- Add resources, for example, all storage systems, servers, hypervisors, fabrics, and switches. See http://www.ibm.com/support/knowledgecenter/SS5R93_5.2.8/com.ibm.spectrum.sc.doc/tpch_t_wz_adding_resources.html.
- Configure communication for alerts. See http://www.ibm.com/support/knowledgecenter/SS5R93_5.2.8/com.ibm.spectrum.sc.doc/fqz0_t_configuring_alerts.html.
- Set conditions for triggering alerts. See http://www.ibm.com/support/knowledgecenter/SS5R93_5.2.8/com.ibm.spectrum.sc.doc/fqz0_r_triggering_conditions.html.

To learn more about getting started with IBM Spectrum Control, see http://www.ibm.com/support/knowledgecenter/SS5R93_5.2.8/com.ibm.spectrum.sc.doc/fqz0_r_getting_started.html.
