Live virtual training classes: Build your skills when you learn from the master trainers who train IBM Lab Services and Technical Support teams throughout the world via deep dive, live virtual classes. Join your fellow Business Partners and IBMers as you get the insider scoop on the latest product updates. All classes include extensive hands-on lab exercises. Classes use WebEx Training Center technology and remote lab access. View the class schedule at [//ibm.biz/ibm-stt](http://ibm.biz/ibm-stt).

Self-paced virtual classes: Take advantage of anytime, anywhere learning with our 24/7 self-paced virtual classes. Once you start, you have 30 days to complete the class.

Hands-on remote labs: Practice what you have learned by performing labs using live systems provided and set up specifically for you. These systems are the same systems used by all of the instructor-led classes. You follow the lab exercise guide to enhance your understanding of the course content. These hands-on remote labs are scheduled for two consecutive business days and include a softcopy course and exercise guide.

Technical events: Looking for something that includes face-to-face interaction with subject matter experts, product demos, hands-on-labs, and networking opportunities? Attend an intensive IBM Systems training event with access to hand-on labs, certification testing and more! With a Competency Voucher, pay \$0 on tuition or use a PGI Voucher and pay only 20% towards tuition. See www.ibm.com/training/events for more information about IBM events.

IBM and its affiliates, and their contractors and subprocessors, may, wherever they do business, store and otherwise process business contact information (BCI) of Client, its personnel and authorized users, for example, name, business telephone, address, email, and user ID for business dealings with them. Where notice to or consent by the individuals is required for such processing, Client will notify and obtain such consent. IBM may use personnel and resources in locations worldwide and third party suppliers to support the delivery of products and services.

Account Data is information, other than Content and BCI, that Client provides to IBM to enable Client's acquisition or use of IBM Products or non-IBM Products or that IBM collects using tracking technologies, such as cookies and web beacons, regarding Client's acquisition or use of IBM Products or non-IBM Products. IBM and its affiliates, its contractors and subprocessors may use Account Data for example, to enable product features, administer use, personalize experience, and otherwise support or improve use of IBM Products and non-IBM Products.
