### ***SUSE Linux Enterprise Server Version 15 now certified for IBM LinuxONE and IBM Z servers running with Oracle Database 19c on premises!***

On January 7, 2022, Oracle announced the availability of the Oracle Database and Real Application Clusters Release 19c with SUSE® Linux Enterprise Server (SLES) on the IBM® LinuxONE and Z® servers.

Customers who have been testing Oracle Database 19c may now proceed to production with confidence that Oracle will fully support their product running on this latest SUSE version. Information on the certification is available on Oracle’s website “My Oracle Support” <sup>(1)</sup>

The certified release of the Oracle Database 19c Release is 19.13 or higher. It is required to use SLES Version 15 Service Pack 3 or higher.

#### **The following table summarizes what is announced:**

Operating System	Oracle Database and Real Application Clusters
SUSE Enterprise Linux Server (15 SP3) *	19c Release at 19.12 or higher

Table 1: SUSE® Linux Enterprise Server Version 15 on IBM LinuxONE and Z servers running with Oracle Database 19c

\* SLES 15 servers must be running SUSE kernel 5.3.18-57-default (s390x) or higher.
