IBM Cognos Analytics 11.1.7 FP3 - Fix List

Component	APAR	Description
General Product	PH28903	11.1.7 iframe for a dashboard does not work with Cognos Analytics on cloud with IBMId
	PH20645	Change of JRE location in CA 11.1.5 broke some CA scripts
	PH35284	SAP BW fails on Linux when sap drivers are placed in the drivers folder for ca 11.1.X
	PH34769	Flipper does not work properly when server has multiple NICs
	PH29670	Authentication fails and namespace is removed from cognos configuration when you start up a second full install with cm disabled
	PH35050	Organization name with special character
	PH30633	Mashup service authentication fails with cm-req-4342 error in 11.1.7
	PH30572	After upgrade to cognos analytics 11.1.7, mashup service authentication is no longer to work.
	PH30521	WSDL prompting end user for credentials
	PH32513	Cogstartup.xml uses wrong hidden hostname by creating new instance, so jmx service is not starting.
	PH32077	Report prompt execution performance issue based on PA after cognos analytics upgrade from ca 11.0.13 to 11.1.7 fp1
	PH31995	Xqe-pnl-0026 Found unsupported iif function arguments.
	PH31347	Cast datetime against Oracle with unexpected result in data module
	PH30605	Framework Manager filter validation hangs when using #sq(csvidentitynamelist())# macros
	PH29535	SAP Hanna data source using Kerberos authentication failing to pull back schemas in portal and metadata in Framework Manager.
	PH37726	Xqe-gen-0005 found an internal error: java.lang.nullpointerexception
	PH36880	A database filter is not submitted to the db in a report query after migration from ca 11.0.13 to ca 11.1.7
	PH33882	Upgraded dynamic cube from 11.1.2 to 11.1.7 and relative time members are not longer visible when creating a report
	JR63353	Maximum number of retrieved rows governor setting in fm is not behaving as expected for DQM
	JR63250	An expression with case statement and count distinct function produces 0 value after upgrading from CQM to DQM
	PH32798	Default aggregation leads to different results in DQM
	PH32696	Union on count distinct aggregation prevents functions to be pushed down
	PH32559	For clause ignored in aggregation
	PH32359	Incorrect SQL generation: unexpected cross join and unwanted tables in from clause

Component	APAR	Description
	PH32338	V5 syntax error in dashboard with crosstab and filtering
	PH32330	Expressions that span multiple metadata sources are only supported for aggregate calculated
	PH32271	Custom sort is not applied to crosstabs within dashboards
	PH32260	Parameter map model in fm not working using single quote single quote single quote, now must use single quote space single quote
	PH32203	Xqe-dat-0001 d1.c2 is not valid in the context where it is used
	PH32151	Report authoring cannot search the measure with special characters from Planning Analytics cube
	PH32139	Xqe-pln-0001 internal error v5aggregatebreakclause incompatible with sqlquerynode
	PH31990	Except operator shows different result with DQM
	PH31951	Xqe-pln-0175 the operand of a standard aggregate can not contain another aggregate.
	PH31949	The operand of the column function sysibm.<function> includes a column function, a scalar fullselect, or a subquery
	PH31893	Performance issue with pa connector.
	PH31642	Different results for running-count in CQM and DQM
	PH31632	After aggregation filter applied as before aggregation filter for filter in query join
	PH31216	Dqm report causes "xqe-pln-0098 vendor specific function is not supported"
	PH31063	Datasource is incorreclty used in report for models that contain multiple datasources
	PH31014	Xqe-cm-0004 unable to parse the data source command block after converting to DQM
	PH30765	DQM report throws a xqe-pln-0131 circular reference error
	PH30677	Warning when validating a trunc function
	PH30676	Arithmetic overflow for report with mod and trunc
	PH30675	Db2 function digits leads to wrong result
	PH30203	Xqe-gen-0005 error when big values are inserted to query properties
	PH29188	Singleton empty in report with query join and page set
	PH29078	Row suppressed in DQM due to null in list header
	PH28071	Localization not returned for member based metadata tree with Planning Analytics
	PH26305	Count distinct causes "xqe-pln-0098 vendor specific function not available" error
	PH26271	Error "count distinct is not supported for queries that span multiple sources."

Component	APAR	Description
	PH25750	Interactive filtering on literal numerical expressions returns no data with DQM package
	PH16473	Cannot import metadata in fm even when presto datasource test successfully
	PH37911	Unable to open tm1 package after upgrading to 11.1.7
	PH37607	Filter expression in prompt not working
	PH36926	Dashboarding - top/bottom filter causes java.lang.nullpointerexception error
	PH36874	Dashboarding - top count filter generates identifier not found '[_numexpr...' Error
	PH36568	Xqe-pln-0098 vendor specific functions not supported in join with 11.1.7 if1031
	PH36372	Descending sort ignored for running-count before join in dynamic query mode
	PH35911	Custom sort does not work for data group items in crosstab
	PH35404	Xqe-pln-0248 for detail filter referencing item from other query
	PH35260	Xqe-gen-0002 an unexpected exception occurred: com.cognos.xqe.ru ntree.relational.vectorization.longcolumnvector incompatible
	PH34940	Blank column in line and column visualization when top and bottom filter is applied directly on on the measure.
	PH34775	Prompts on report page unable to filter queries
	PH34753	Run as a user, sso database connection failed with constrained delegation
	PH34749	Java.lang.nullpointerexception for report with rank, maximum, total and list footer
	PH34746	Xqe-pln-0098 vendor specific functions not supported in join
	PH34745	Default aggregation for count aggregation
	PH34660	GM reports fail to run with read timed out after the migration from 11.0.13 to 11.1.7 + if1023
	PH34467	Xqe-pln-0385 when using the filter or summarized with default count distinct in dashboard with combined data modules
	PH34383	Reports that use database functions(udfs) fail after upgrade
	PH34073	Business function last of month expression will cause overflow in oracle resulting in ora-01841
	PH34072	Setting detail aggregate property to median causes rsv-val-0010 failed to load the report specification.
	PH34068	DQM has no timestamp equivalent for _date_to_int which results in database errors when running reports
	PH34039	Report authoring cannot search the member as subsets with ampersand (&) characters from planning analytics cube
	PH33833	Framework Manager reads sap iq schema with all the partitions tables
	PH33826	Autorest connection ceases to return data in 11.1.7 fp2

Component	APAR	Description
	PH33822	Sqlidentifier.delimitname() has no protection against npe for the 2 first arguments.
	PH33735	Report view created off of a report using tm1 cube fails with an error: xqe-gen-0010 found an internal error
	PH33715	Global filter with top count filter in dashboard returns "the vendor specific function is not supported."
	PH33702	DQM report with in_range filter shows xqe-gen-0002 error
	PH33599	_years_between throws exception when second argument is nullvalue object - vectorization:on
	PH33598	_years_between throws exception when second argument is nullvalue object - vectorization:off
	PH33479	Requests continue to route to busy query service when many query services are free and healthy
	PH33469	Report errors with xqe-dat-0001 "db2admin.tablename" is an undefined name after upgrade
	PH33464	Xqe-gen-0002 an unexpected exception occurred java.lang.stackoverflowerror after report upgrade
	PH33433	Query service will run out of memory after validate the expression with two decimal points in a number from dashboard
	PH33391	Xqe-dat-0001 data source adapter error: java.sql.sqlexception: [amazon](500310) invalid operation: full join is only supported w
	PH33390	Report fails with xqe-dat-0001 data source adapter error .SQLSYNTAXERROREXCEPTION: "db2admin.table17" after upgrade
	PH33383	Topcount filter in dashboards returns "column "c3" does not exist in..."
	PH33291	Report fails with xqe-dat-0001 data source adapter error: java.sql.sqlexception: [amazon](500310) invalid operation: column "c3"
	PH33290	Topcount filter in dashboards returns more rows than expected in a multi-fact query
	PH33227	Report fails with error xqe-gen-0002 an unexpected exception occurred: java.lang.stackoverflowerror
	PH33195	Report fails with xqe-dat-0001 "c3" is not valid in the context where it is used. After upgrade.
	PH33182	Prestodb datasource connection fails in fm with errors "bmt-imp- 0002 failed to execute metadata request. Jdbcsqlexception caf-wr
	PH33157	Upgraded report now fails with a xqe-pln-0020 error
	PH33155	Xqe-pln-0385 when using count distinct aggregation with multiple data sources in query on a data module
	PH33069	Descending sort ignored for running-count in Dynamic Query Mode
	PH33065	Different results for join after 11.0.13 IF 1065
	PH33005	Java.lang.nullpointerexception for report with running-minimum, running-count and detail filter on result
	PH32993	Single select prompt is generated for in-filter when using view tabular data
	PH32986	Different processing after 11.0.13 IF 1065
	PH32975	Java.lang.nullpointerexception for detail filter on case-when expression

Component	APAR	Description
	PH32935	Xqe-gen-0001 the method copyfrom is not implemented.
	PH32933	The statement is too long or too complex
	PH32930	Xqe-pln-0119 for DQM report without auto-group and summarize
	PH30914	Ranking and running count incorrect after IF 1004
	PH30624	Outer join only returns first row after if applied
	PH30202	Accessibility - aria roles used must conform to valid values
	PH29202	Accessibility - IBM Cognos Analytics icon indicates a checkbox in reader
	PH27222	User needs to refresh browser when authenticating to a namespace from anonymous to see the change in welcome page
	PH20392	Navbarselectline not working when using themes in 11.1.4
	PH36537	Using run as you get the request to run ... Was successful popup . If on the run as page at the time you go to the welcome page
	PH35457	Button not colored by appbarforeground in appbar
	PH35456	Line break for label of sample.folder.opener
	PH34180	Cannot rename a folder by appending a zero to the front of the name
	PH33003	Custom theme causing error java exception error in cognosserver.log
	PH30297	Thirdpartycertificatetool may export wrong ca certificate
	PH29816	Wrong assginment in poland map.
	PH17129	11.0 and 11.1 wordcloud visualizations cannot handle nulls
	PH37102	[dashboard] inconsistent values displayed in visualization on stacked column chart when rendered in browser.
	PH33436	Bar column visualization no hovering tooltips over small columns in reporting
Administration	PH32762	Content added to e-mail body when updating the schedule without confirming in the delivery pane
	PH30679	User with missing capability can schedule by minute and by hour
	PH25362	Changing the owner for a schedule in new ui with "use my credentials" isn't working in ca 11.1.6
	PH35090	Unable to uncheck save button when save file to external location is checked
	PH34308	Include link always selected for upgraded schedules
	PH32781	Saving scheduled report to external file system failing with cnc-ds-0031 cannot find the alias with the search path ''
	PH32740	Not able to remove recipients from schedule option "sent report to mobile device"

Component	APAR	Description
	PH32282	Scheduled tasks start one hour earlier in sao_paulo timezone
	PH32143	Choosing 'run as' on a report with format 'default' selected in its properties does not respect the users preferences
	PH31655	Cannot select past and current activities under manage > activities
	PH31603	Links to reports in emails missing when using 'change default setup options' in the job
	PH31223	Typo in Manage - Data servers – Connections when listing schemas
	PH31092	New recipient is not retained when editing an existing schedule using the directory option.
	PH31043	Error creating external repository connection to file system
	PH30350	For burst report the to: field is shown in email when it should not
	PH30258	On change default step options in an existing job, a blank screen is displayed when editing the details
	PH29971	Running report in background cannot select only save to file system option
	PH29605	Capabilities show blank screen after customizing access while using ie
	PH28607	Empty email subject when attaching a report output
	PH24853	Tenant impersonation option is not showing the available tenant ids
	PH22947	Jobs upgraded from cognos analytics 11.1.2 to 11.1.4+ clears out job steps in new glass ui when using email delivery.
	PH22341	Send report to mobile device (delivery option) available for all reports after upgrading to an intern fix
	PH16357	Report path shows user camid instead of user "My content" path in the "My schedules and subscriptions" UI.
	PH37339	My schedules and subscriptions, run once option doesn't response in 11.1.7 if1033
	PH37258	View the details of this report after closing this dialog is missing from run as after upgrade to Cognos Analytics
	PH37188	Job step appears blank when removing another job step that is no longer available (ie/edge in compatibility mode)
	PH36814	Administration: users can not see schedules until given write permission on the folder
	PH36486	Unable to edit parameter values for agent in job
	PH36375	User with no capability to schedule by minute can schedule a report by a fraction of the hour in new ui.
	PH35887	Unable to deselect save delivery option when editing existing schedule
	PH35607	All scheduled instances are not visible under upcoming activities
	PH35355	View the details of this job after closing this dialog is missing from run as after upgrade to Cognos Analytics
	PH35049	Unable to select all schedules in my schedules and subscriptions in Cognos Analytics

Component	APAR	Description
	PH34210	Triggername persist when changed schedule from trigger to time schedule and cause the schedule to execute twice
	PH34143	Schedule menu disappears after setting prompt values
	PH33830	Content Manager consumes 99% cpu usage after switching standby to active
	PH33475	Can not add user to email from directory
	PH33466	Opening large job is very slow with new Glass UI
	PH33325	Blank page when creating a schedule
	PH33177	Unable to save file to the file system without saving the report in the content store.
Cognos Application Firewall	PH36422	CAF (cognos application firewall) throwing error from the secure log handler when handling Cognos for Microsoft Office report.
Cognos Connection	PH35922	Download image icons for excel report saved outputs in chrome/edge browsers in admin interface.
Cognos SDK	PH30162	Reports run via SDK result in inverted parameters and fail with xqe-pln-0537
Cognos Viewer	PH32558	Business style has changed in ca11.1.7 which is causing the prompt page to be shifted for a user on every report
	PH38755	Drill links set to open in new window will reuse same new tab when clicking second drill link in source report.
Content Manager	PH31853	The AUDIT COGIPF_VIEWREPORT table shows inconsistent information
	PH34435	Cm ran out of query cache handle.
	PH33866	We are exhausting lockhandlecache freelist, and code has a hard coded 5000. Request to adjustable.
	PH27362	Cognos analytics on demand - cannot create folder with the same name but in different tenants
	PH34429	Cm stability issue - it happens almost weekly, forcing restart.
	PH32818	System hang because a dead lock between cm and cam
Collaboration	PH30905	Using the search directory option in the send report to email dialog box does not show users in Internet Explorer
	PH34362	The "search directory" tool does not work as expected for users who don't have the "type in external email" capability
Content Navigation	PH22670	Back button in workspace does not work and throws Http 404 error
	PH11971	Share link does not set custom perspective correctly
	PH36180	Routing rule creating group tag does not complete
	PH34601	After applying if1025, select a source button does not work and users are unable to create a new report.
	PH33002	Button folder lacks "create url" and "upload files" functionality
	PH38403	Functions append file, replace file are not working for shortcuts to uploaded files. If they are selected - no action takes place

Component	APAR	Description
Dashboarding	PH32681	Internet explorer crashes when clicking off a text object, in dashboard or story, when written in Korean
	PH39077	Waterfall chart does not recognize value axis show zero origin chart property in HTML
	PH32148	Filter on line and column chart is filtering the line and column independently, instead of filtering together
	PH32108	Filter label in dashboard changes when selecting new filter values
	PH31887	Custom sorting on a standalone calculation does not sort the items correctly
	PH31814	"operation failed" error when upgrading dashboards where default font family has been restored on visualization legend or axis
	PH35229	Dashboard with expression based filters returns 'an internal error has occurred, please see the log for details.'
	PH33913	Very large data modules results in 5+ sec wait times in dashboard
	PH33604	Hover tooltip unavailable in dashboard when value is null
	PH32892	Waterfall visualization does not expose "value axis show zero origin" option
Delivery Service	PH30877	Email attachment as .dat when report name contains thai characters or thai + english characters in ca 11.1.7
	PH29736	Email attachment file name corrupted when report name contains thai characters or thai + english character in ca 11.1.7
	PH33752	Cnc-ds-0025 cannot write the report output to the file system - if report name has () and using "version number" for conflict resolution
Extensions	PH24398	Uploading a .zip file containing images for the Image Gallery extension fails if the file exceeds 130mb
Job Scheduling and Monitor Service	PH31869	Ca 11.1.7 job report status changes from "defined by report" to "custom" after viewing report without making any changes
	PH30644	Failed schedule without valid credentials does not throw an error and no entry under activities
	PH30352	Making changes to default step options for pdf format not taking effect
	PH35949	Broken link in job won't allow ability to re-link to report view, only report
Jupyter	PH32055	Failure to open a notebook at first attempt when using internet explorer
Modeling	PH32299	Expanding members in a dashboard filter with hierarchy don't load all members
	PH31726	Msr_gen_0035 the module was not found after migrating data modules from ca 11.1.1 to ca 11.1.7 fp1
	PH30435	When updating a uploaded excel file then the following error message appears: msr-upl-2106 incompatible data type
	PH28441	Cannot cast an unsupported vendor data type to one which is supported by Cognos while using a data module (but can when using French).
	PH26686	Summary: when uploading a file with an extension of ".xlsx", we get the following error: xlsx is not a supported file type

Component	APAR	Description
	PH25655	Adding a table to a db schema, results in it being selected when you load metadata for a data module.
	PH25273	Xqe-pln-0175 error validating calculation in dashboard.
	PH26124	Error in a data module calculation when it is joined with an uploaded Excel sheet
Query Studio	PH35336	Qe-def-0260 when trying to run a query studio report with a varchar filter
Report Authoring	PH32654	Accessibility - single select value prompt causes elements must only use allowed aria attributes
	PH31514	Folder path is missing in report properties
	PH31328	When running a report, the expectation is that when you use shor tcut ctrl+shift+2, the first section on the report should be...
	PH28847	Typing am or pm in date-time prompt not being submitted
	PH27390	Table not centering on prompt page in classic viewer
	PH26588	'filter for report' missing in report authoring in 11.1.5 for levels in dmr package
	PH25521	Accessibility - incorrect navigation to more entry in tree prompt
	PH25113	Typeerror, rsstartupblock errors in Firefox and Chrome in ca 11.1.x reporting
	PH20435	Unable to input in query studio report prompt
	PH35439	Content Manager did not return information for permission denied error appears on the source report after the drill through
	PH34913	Javascript error running report as csv in the backgound and ie11 hangs after iterating several attempts
	PH34795	Custom font used for the axis of a combination chart is not displayed correctly.
	PH34701	Performance issue when switching between report pages in ms edge
	PH34253	Editing queries of a report is very slow
	PH34022	Type error received when deleting a query in report
	PH33797	Refresh on prompt query property does not work when using tabs
	PH33667	Message "layout reference not found" when adding a block referencing a prompt from another report
	PH33094	Navigation in reporting edit mode is slow in chrome
	PH32906	Expanding references in report authoring does not finish
	PH32844	Typeerror: cannot read property 'indexof' when attempting to create a report and switching between browser tabs
	PH06983	Opening the referenced report property to check/update the report used in a report reference takes you to team content
	PH32069	Filter for report option not available with levels in a dimensional package

Component	APAR	Description
	PH33051	When selecting a source to create a new report, nothing happens if you click the top third of the Open button.
	PH33148	Applying a filter to a column results in missing cell borders.
Report Server	PH32119	Drilling through to a target report hangs in classic viewer if user lacks permissions on target report
	PH31982	Report with html item and data module as a source run via sdk result in rsv-srv-0031
	PH31676	Accessibility - cannot navigate date picker using arrow keys
	PH31609	Missing delimiter(,) causing the rows to split when large data is being reported in csv format from a joined query
	PH30691	When a report has multiple tabs and executed in the excel after being run in html, the html report refreshes, focuses on1st tab
	PH30550	Editing a large report in Chrome is extremely slow.
	PH28242	Report run as csv missing data when csv advanced parameters set
	PH22935	Drill-down on dmr reports no longer have same functionality as 11.0.6/Cognos 10.
	PH22148	Routing rules for packages are not applied when pasting a report spec.
	PH35733	Rendering a report output in excel, pdf, or html on rhel on power takes much longer than on rhel on intel
	PH33811	Text '_x001f_' gets stripped from string when exported to excel
	PH33053	Setting number decimal places to 0 for the measure in a combination chart produces rsv-srv0040 error
	PH13890	Opening up the target report in edit mode after drilling through switcher goes to the source report
	PH36953	Execute a tab report and run it again as csv from tab three then the tab three has the content from the first tab
	PH35331	Performance details are not presented with report having a layout reference
	PH35293	CA 11 report with prompts returns error "rqp-def-0371 operation unsupported in forward only cursor mode was used"
	PH32973	When running a specific report as csv format in background, cm-req-4253 error occurs.
	PH10964	Errors using large prompt selection values when prompt parameter auditing is enabled over TCP protocol.
Search	PH35734	Schedules from my content reports cannot be seen in the my schedules and subscriptions pane until credentials are renewed
	PH36822	SEA-GEN-0001 Internal error: Failed to write object to policies storage
Smarts	PH36340	Assistant incorrectly qualifying values of global calculations for filters with table name/columnfilterfilterfilterfilter
	PH32088	Crosstab displaying an if calculation against an fm package data source only returns a single row
