

IBM Planning Analytics Engine 12.1.1 - Fix List

Component	ID	Description
Planning Analytics Engine	TM1-558	Intermittent issue where }ElementAttributes_Client dimension is not written to metadata, causing restart loop
	TM1-614	Unable to save large backups (> 5 GB) to Amazon S3
	TM1-620	Creating and then deleting a private subset occasionally fails when high availability is enabled; the deleted subset remains available
	TM1-641	Removing a sandbox intermittently fails in Planning Analytics Workspace when high availability is enabled
	TM1-651	Sorting a very large set hierarchically is slow and eventually causes a 520 error
	TM1-654	MDX queries containing an order operation over a large filtered set take exceptionally long time to execute
	TM1-665	Cookie set by ExecuteHTTPRequest should be used for an ASCII data source that is specified as a URL and for the ASCIIOUTPUT and TEXTOUTPUT TurboIntegrator functions
	TM1-691	Request the ability to cancel a long running asynchronous MDX query
	TM1-693	Deadlock occurs during single replica database upgrade
