# IBM Planning Analytics Workspace 2.0.92  - Fix List

| Component | APAR | Description |
|-----------|------|-------------|
| **Workspace** | PH49877 | Predictive forecast error when forecasting at consolidated level |
| | PH53337 | Export to PDF change in behavior compared to previous versions of Planning Analytics Workspace |
| | PH54253 | Incorrect path in Action button in a deployed book |
| | PH55132 | Running `start.sh` in terminal adds extra characters to the `paw.env` file (user and pwd) when the base64 encoding takes place |
| | PH55234 | Planning Analytics Workspace export to PDF does not look as expected, incorrect alignment and overlap |
| | PH57447 | Unable to download large files from Planning Analytics Workspace file manager |
| | PH57765 | Selector widgets change size when upgrading to the new Selector visualization |
| | PH57801 | "Something went wrong in PAMigration" error when selecting a snapshot in Lifecycle Management |
| | PH57803 | Saved MDX views with named subsets show "selection" |
| | PH57931 | Blank errors occur in Planning Analytics Workspace due to environment permissions in Planning Analytics as a Service |
| | PH57950 | Unable to update MDX - "syntax error at or near" |
| | PH57970 | Drill fails with MDX error |
| | PH58071 | Dimension doesn't update in Selector visualization |
| | PH58185 | Planning Analytics as a Service - automated backups always falling back to signed URL approach |
| | PH58264 | Ordering of tasks in Applications and Plans has been defaulted to sort alphabetically |

| Component | APAR | Description |
|---|---|---|
| | PH58282 | Palette setting for reports is reset during deployments across platforms in Planning Analytics Workspace |
| | PH58367 | When a book contains multiple Selector widgets, selecting a value from a widget produces erratic behavior |
