#### DESCRIPTION

VM/Integrated System (VM/IS) Release 5.1 service refresh does not add new products or change the release/version of existing products. It refreshes current copies of selected VM/IS programs at a new service level. The programs are updated to 8804 PUT Service or the equivalent service level.

The Migration Aid feature is refreshed and will assist the system administrator in migrating from VM/IS 5.0 to the VM/IS 5.1 refreshed base. There is no migration aid feature supporting migration from VM/IS 5.1 to the refreshed VM/IS 5.1 base. The following products are updated in the refresh:
