

IBM SPSS Statistics Curriculum Fact Sheet

Our IBM SPSS Statistics curriculum is comprised of courses that allow users to become familiar with the software or increase your knowledge of a particular statistical technique. The following courses will help you quickly master the skills needed to productively work with your IBM SPSS Statistics software.

Click on the course codes to access a course description, view its schedule and enroll.

Check out the **IBM SPSS Statistics Learning Center** (<http://ibmtvdemo.edgesuite.net/software/analytics/learning-centers/spss-statistics/index.html>) for information on getting started, and resources such as the IBM SPSS Predictive Analytics Community.

Job Role	Definition
New User	New users of IBM SPSS Statistics or anyone who has not used IBM SPSS Statistics for a long time. The courses in this training path provide the foundation for learning to use IBM SPSS Statistics as well as exposing users to various techniques for managing, manipulating, and analyzing data.
Data Management & Reporting	Users of IBM SPSS Statistics whose primary role is to manage data sets or report the finding obtained from the data. The courses in this training path provide users with knowledge on how to produce complex tables and graphs, automate processes, and extend the functionality of IBM SPSS Statistics.
Data Analyst 1	Users of IBM SPSS Statistics that will have as their primary role to analyze data. The courses in this training path provide in-depth coverage of specific data analytic techniques that can be used in a number of situations.
Data Analyst 2	Users of IBM SPSS Statistics that will have as their primary role to analyze data. The courses in this training path provide additional skills (i.e., reporting and automation) that complement the data analyst as well as offer coverage of specific data analytic techniques that can be used in specific situations (i.e., survey, market and health research).
IBM SPSS Statistics Certification	Experienced users of IBM SPSS Statistics who wish to have a refresher on various techniques for managing, manipulating, and analyzing data before taking the IBM SPSS Statistics Level 1 Certification Exam.
