

**IBM Micromedex Poisindex:
Tox & Drug Product Lookup Enhancements**

Live in online versions beginning the evening of October 13, 2021

Next time you log into IBM Micromedex Poisindex, check out these new enhancements...

Access: Navigate to the Tox & Drug Product Lookup from the main nav bar, rather than the drop down.

Search: This page has a new look and feel. Search for a product, drug, AAPCC code, or more using the main search bar. Tab over to perform a search for Martindale, or for company contact information (*new feature*).

Improved search results sort: We've updated the search algorithm and removed the tabs at the top of the results, so now what you search for, should show up at the top.

Preview Pane: This new view allows you to see the details of the results, directly from the results page. Select different results on the left until you've found what you need, and scroll through the details on the right to view the AAPCC code, product description, active ingredients, and more.

Name	Active Ingredient	Physical Description	Company	AAPCC
1. Lysol	N-Alkyl Dimethyl Benzyl Ammonium Chloride - 1.3% Pine Oil - 9% Water - Less Than 89%	Oily Liquid Brown	Finn Scientific	039282
